THANK YOU for your interest in INFINI treatments, the latest anti-aging device from LUTRONIC. Print a copy of this informational flier for your physician or aesthetic practitioner, so they can contact us for more information.

INFINI is a unique technology that combines Comfort Flow™ micro-needling with fractional RF, enabling the practitioner to perform affordable, customized treatments, on all skin types. Infini combines the ability to adjust the depth of treatment, the energy delivered, and the duration of thermal-coagulative heating in the treated skin, for 3D volumization and wrinkle reduction.

- Low cost consumables (under \$100 per tip)
- Fast treatments; 49 microneedle tip can deliver more than 100k Thermal Coagulation Points (TCPs) in one session
- May be safely delegated to ancillary staff
- Produces revenue all year long, safe and effective on dark or tanned skin
- Creates targeted coagulation zones to smooth wrinkles and improve aging, sagging skin
- Quick and easy recovery, less downtime than CO₂
- Less pain and cost than micro-focused ultrasound
